Continuation of Substance of Interview including description of the general nature of what was discussed: the examiner called applicant to object to the disclosure which appears to be hard to understand because not only is it a direct word for word translation of Japanese to English but at many pages there is no space between words of a sentence (see for example, page 3, paragraph [0008], line 4). Also the examiner cited the above art to applicant, which breaks the unity of invention and requested oral election. However, Mr. Cole indicated that applicant needs a written restriction letter. He also indicated that he will provide a substitute disclosure that can be better understood.
